DON'T JUDGE

Nancy is a very smart girl who comes from a well known family. Her family was also very popular in school and also categorized as mean popular girls just like all popular girls in the past. Some kids don't understand that they can't just judge a person by past experience, where they come from or how they look. Nancy meets a girl who's named Isabelle in school and become very close friends with her. Isabelle has been in the school for a few years already, and is treated differently and unfair because she is very quiet and geeky looking. Nancy however thinks very highly of Isabelle and believes that she can help her come out her shell. Jacob however another classmate spreads rumors and turns everyone against Isabelle and Nancy, which makes Nancy and Isabelle very upset. Then a new girl in school came along, her name was Lizbeth she got in the school through a scholarship that was given to her because of her good grades. She didn't have any friends so Isabelle and Nancy welcomed her with open arms and became her friends. However no one liked her because everyone knew she and her family were very poor. Jacob also spread rumors about Lizbeth and made everyone in school believe bad things about the girls. In the end the girls proved to everyone that what Jacob was saying about them were only rumors and that they weren't what everyone thought they were. They proved everyone wrong and teach their classmates, not to judge by what they hear but what's inside is what really matters.

The End
